

The Modular Power Center (CPM) offers 3 receptacles that can accommodate either PTO or starters, at your convenience. Each section is independent and can be isolated to allow maintenance without having to open or interrupt the ac-

tivity of other receptacles. This user-friendliness saves significant time and increases productivity and worker's safety. The Modular Power Center is compact, mobile and can be set up quickly.

## FEATURES

Family	Tension	Section A	Section B	Section C	Option	Version	
CPM							
5	480	D1 Starter	D1 Starter	D1 Starter	S1	120/240 dist	01
6	600	P1 PTO 200A	P1 PTO 200A	P1 PTO 200A	S2	Voltage detector	
10	1000				S3	Protective cage	

Ex: CPM6-P1P1P1-S1-01

Note:

- D1 Multiplex motor starter, 25HP to 100HP with adjustable overload relay
