

Meglab Power Take Off panels are manufactured and tested to current applicable standards. Built to be used in harsh mining environment they offer reliable and safe condition to power mobile equipment, fans, pumps and other necessity in under-

ground mining.

COMPONENTS

- NEMA 12 industrial enclosure (24x25x10)
- NEMA 12 industrial enclosure EXTRA LARGE (42x25x10)
- 3 point latch door handle
- Drip hood
- 200A circuit breaker
- Flange mounted circuit breaker handle with flex shaft operator
- Contactor
- Control transformer with fused primary and secondary
- Startco SE-105 ground fault relay with current transformer
- Test circuit push button and pilot lights using 22mm industrial operators
- Flange mounted 225A coupler (lever action)
- Coupler protection cap
- JSC-88 Voltage indicator
- Schematics

Control transformer

Contactor

Startco SE-105
