CONSTRUCTION

OUR MISSION

Together with customers, the Meglab team identifies, designs, manufactures, installs and supports innovative and customized solutions. The goal is to optimize production, reduce costs and ensure a safe and healthy environment.

A TEAM CONNECTED TO YOUR NEEDS

What sets us apart is our customer-oriented approach. We listen to customers' needs, we are not afraid to innovate in order to offer the best solution, we are committed to making the solution work and we meet our commitments to deliver on time.

The vast experience of our multidisciplinary team enables us to offer solutions from start to finish, from consulting, to manufacturing, to installation and service.

ABOUT US

Meglab construction is a new division of the Meglab group. The team is mainly led by Steve Aukstinaitis and Daniel Dufresne.

Steve is an electromechanic with nearly 25 years experience in the industrial sector. In particular, he worked as an electrical supervisor and superintendent on major projects. His experience spans from the mining sector, to the forestry industry, to the institutional sector.

Daniel is a master electrician with 20 years experience in oil and mining projects. Among other things, he coordinated the embankment plans' construction, ventilation plans and electrical chambers.

WITHOUT FORGETTING ALL THE EXPERTISE OF THE MEGLAB GROUP BEHIND US!

OUR COMMITMENT

Inspired by the Meglab values, Meglab construction works to realize your projects in compliance with 3 major commitments.

OUR TURNKEY
SOLUTIONS
OPTIMIZE
PRODUCTIVITY,
INCREASE SAFETY
AND RESPECT THE
ENVIRONMENT.

HEALTH AND SAFETY

Nothing is more important than the health and safety of our employees and yours. We ensure a safe and healthy work environment throughout our projects and develop systems that eliminate risks for your teams.

ENVIRONMENT

We offer sustainable and reusable solutions, while offering intelligent systems that enable significant energy savings. Let us work together to develop more environmentally friendly and responsible projects.

QUALITY

We offer products, reliable, high quality and deliver on time. Our technologies and commitment aim to optimize the pace of your production while reducing your operating costs.

OUR OFFER

Meglab construction specializes in electrical, mechanical and welding services. Our offer aims to diversify the activities of Meglab and consolidate the expertise.

Recognized as specialists in underground mining, the Meglab team can now count on an experienced team to develop construction projects in open pit mines, ore processing facilities, pulp and paper mills and other major industrial projects.

Whether for the realization of projects or for maintenance in the industrial, commercial or institutional sectors, our different teams accompany you from A to Z.

OUR SERVICES

Meglab construction offers a diverse range of services in electricity and industrial maintenance. 24/7 emergency
